The screenshot displays a Windows 10 desktop environment with multiple applications running. The primary application is Microsoft SQL Server Reporting Services (SSRS) titled "PassagiereUndFluege - Berichts-Vie". The report, "Passagiere und Flüge", is displayed in a table format with the following columns: Passnummer, Vorname, Nachname, Abflug, Flugnr, Preis, and Sitzplatz. The data is filtered for flights on 08.07.2011. Overlaid on the SSRS window is a "Save As Report" dialog box, showing the report being saved to "http://nbpash01:81/ReportServer". Another window, "Administrator: Eingabeaufforderung" (Command Prompt), is open in the bottom right, showing the user "ASH" at the "NBPASH01" machine, with commands like "hostname" and "whoami" being executed. The taskbar at the bottom shows the following icons: File Explorer, Microsoft Edge, and several instances of "PassagiereUndFluege - Berichts-Vie". The system tray in the bottom right corner shows the date and time as "11/11/2023 11:11:11".
